

Relatório sobre a utilização das receitas geradas pela venda em leilão de licenças de emissão

2021

**SUBMETIDO À COMISSÃO EUROPEIA NO ÂMBITO DO REGULAMENTO GOVERNAÇÃO
DA UNIÃO DA ENERGIA E DA AÇÃO CLIMÁTICA**

Enquadramento

No âmbito da implementação do regime do Comércio Europeu de Licenças de Emissão¹, Portugal tem direito a um montante de licenças para colocar em leilão. Existem dois tipos de licenças: as designadas licenças de emissão gerais no âmbito das atividades industriais de energia e industriais (licenças gerais), e as licenças de emissão da aviação no âmbito das atividades de aviação, que sendo distintas são leiloadas separadamente. A totalidade das receitas geradas pela venda em leilão das licenças destinadas a Portugal constituem receita do [Fundo Ambiental](#).

Apresenta-se o Relatório que foi apresentado à Comissão Europeia sobre a utilização de receitas geradas pela venda em leilão de licenças de emissão relativo a 2021 dando cumprimento ao n.º 2 do artigo 19.º do Regulamento da Governação de Energia e Ação Climática², e que segue o modelo que consta do anexo II do Regulamento de Execução (EU) 2020/1208 da Comissão³, sendo composto por:

- Quadro 1a: Indicação do valor das receitas da venda em leilão das licenças de emissão no ano X-1 com distinção entre o leilão das licenças gerais e da aviação;
- Quadro 2: Indicação do valor total de receitas que foram utilizadas em conformidade com os artigos 3.º-D (aviação) e 10.º (instalações) da Diretiva 2003/87/CE ao nível nacional;
- Quadro 3: Indicação do valor total de receita utilizada para efeitos internacionais (para apoiar países terceiros e países em desenvolvimento);
- Quadro 4: Indicação do valor de receita utilizada com o intuito de apoiar países em desenvolvimento através de canais multilaterais;
- Quadro 5: Indicação do valor de receita utilizado para apoio bilateral ou regional para países em desenvolvimento;
- Quadro 6: Informações complementares sobre a utilização das receitas a nível nacional, por tipo de despesa, que os Estados-Membros podem fornecer

¹ Estabelecido pela [Diretiva 2003/87/CE](#), do Parlamento Europeu e do Conselho, de 13 de outubro, na sua atual redação, sendo aplicável a instalações fixas do setor da energia e indústria, bem como ao setor da aviação. Constitui um dos principais instrumentos das políticas de mitigação de emissões de gases com efeito de estufa estabelecidas pela União Europeia para combater as alterações climáticas.

² [Regulamento \(UE\) 2018/1999](#) do Parlamento Europeu e do Conselho, de 11 de dezembro de 2018

³ [Regulamento de Execução \(UE\) 2020/1208](#) da Comissão, de 7 de agosto de 2020, relativo à estrutura, ao modelo, ao processo de apresentação e à análise das informações comunicadas pelos Estados-Membros em conformidade com o Regulamento (UE) 2018/1999 do Parlamento Europeu e do Conselho

Destaques do relatório

- 100% das receitas obtidas por Portugal pela venda em leilão das licenças de emissão foram alocadas a promover um desenvolvimento assente numa economia competitiva e de baixo carbono e para o financiamento da política climática nacional, no cumprimento dos compromissos nacionais em matéria de alterações climáticas. Foram também utilizadas para apoiar projetos que visam reduzir as emissões de gases com efeito de estufa ou que visam proceder à adaptação dos territórios e sociedades aos efeitos inevitáveis das alterações climáticas;
- Em 2021, foi utilizada uma receita de 513 900 105 Euros, da qual 98,5% advém do leilão das licenças gerais e o remanescente provém do leilão das licenças da aviação;
- 99,6% da receita foi utilizada para financiar projetos a nível nacional;
- O apoio a países em desenvolvimento foi efetuado por intermédio de apoio bilateral, sendo na sua maioria providenciado a Países Africanos de Língua Oficial Portuguesa (PALOP);

Table 2: Use of revenues from auctioning of allowances for domestic and Union purposes pursuant to Articles 3d and 10 of Directive 2003/87/EC

Purpose for which revenues were used Revenues	Short Description	Amount (1000 Euros)	Status	Revenues Pursuant To Article3d	Revenues Pursuant To Article10	Type Of Use ⁽¹⁾	Financial Instrument ⁽²⁾	Implementing Agency	Comments
Windfloat project	Financial support during the operational phase of the Windfloat project	2 033,62703	Disbursed	No	Yes	development of renewable energies to meet the commitment of the Union	financial support policy	Secretary-general for Environment and Climate Action	The WindFloat project consists of the development of a pre-commercial floating offshore wind farm using the WindFloat technology. The project will entail the installation of 25 MW at approximately 20 km off the coast of Portugal. The project is designed for a total lifetime of 25 years. WindFloat is a so-called semi-submersible floating platform inspired by some of the structures employed in the oil and gas industry. The platform is designed to be sufficiently stable to accommodate standard commercially available wind turbines with only minor modifications
National Energetic System (SEN) - Windfloat project	Support of the investment related to the installation of the underwater cable connecting to the Windfloat project (Resolution of the Council of Minister n.º 161/2019)	2 384,403	Disbursed	No	Yes	development of renewable energies to meet the commitment of the Union	financial support policy	Secretary-general for Environment and Climate Action	not applicable
ETS management in Portugal	Administrative expenses of the management of the ETS in Portugal]	6 200,21277	Disbursed	No	Yes	coverage of administrative expenses of the management of the EU ETS	financial support policy	Secretary-general for Environment and Climate Action	not applicable

(1) to be selected:

Categories of uses mentioned in Article 10(3) of Directive 2003/87/EC as follows:

funding of research and development and demonstration projects for reducing emissions and for adaptation;
 funding of initiatives within the framework of the European Strategic Energy Technology Plan and the European Technology Platforms;
 development of renewable energies to meet the commitment of the Union;
 development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;
 development of technologies that help meet the commitment of the Union to increase energy efficiency;
 forestry sequestration in the Union;
 environmentally safe capture and geological storage of CO₂;
 encouragement of a shift to low-emission and public forms of transport;
 financing of research and development in energy efficiency and clean technologies;
 measures intended to increase energy efficiency and insulation or to provide financial support in order to address social aspects in lower and middle income house-holds;
 coverage of administrative expenses of the management of the EU ETS;
 promotion of skill formation and reallocation of labour in order to contribute to a just transition to a low carbon economy;
 other reduction of greenhouse gas emissions;
 adaptation to the impacts of climate change;
 other domestic uses.

Categories mentioned in Article 3d(4) of Directive 2003/87/EC, but not specifically mentioned in Article 10(3) as follows:

funding of common projects to reduce greenhouse gas emissions from the aviation sector;
 measures to avoid deforestation.

(2) To be selected: fiscal; financial support policy; domestic regulatory policy that leverage financial support; other.

Table 6: Complementary information on domestic use of revenues by type of spending

Category	Amount Disbursed (1000 Euros)	Amount Disbursed (1000 Local Currency)	Amount Committed (1000 Euros)	Amount Committed (1000 Local Currency)	Category In Table2	Share Amount (%)	Comments
Direct support to mitigation in sectors covered by the EU Emissions Trading System (EU ETS) ⁽¹⁾	0		0			0	not applicable
Indirect support to mitigation in sectors covered by the EU ETS (e.g. innovation) ⁽²⁾	0		0			0	not applicable
Direct support to mitigation of domestic/EU emissions in sectors not covered by the EU ETS ⁽³⁾	504 440,88503		0		(a) development of renewable energies to meet the commitment of the Union;(e) encouragement of a shift to low-emission and public forms of transport	98,59	not applicable
Indirect support to mitigation of domestic/EU emissions in sectors not covered by the EU ETS (e.g. innovation) ⁽⁴⁾	0		0			0	not applicable
Compensation of carbon cost burden ⁽⁵⁾	0		0			0	not applicable
Non-mitigation spending (e.g. adaptation) ⁽⁶⁾	7 200,21277		0		(a) coverage of administrative expenses of the management of the EU ETS	1,41	not applicable
total	511 641,0978						

(1) Spending reported in this category could cover the share of spending relevant for ETS sectors reported under the following categories in Table 2:

- (a) development of renewable energies to meet the commitment of the Union;
- (b) development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;
- (c) development of technologies that help meet the commitment of the Union to increase energy efficiency;
- (d) other reduction of greenhouse gas emissions;
- (e) funding of common projects to reduce greenhouse gas emissions from the aviation sector.

Table 6: Complementary information on domestic use of revenues by type of spending

(3) Spending reported in this category could cover the share of spending relevant for ETS sectors reported under the following categories in Table 2:

- (a) funding of research and development and demonstration projects for reducing emissions and for adaptation;
- (b) funding of initiatives within the framework of the European Strategic Energy Technology Plan and the European Technology Platforms;
- (c) environmentally safe capture and geological storage of CO₂;
- (d) financing of research and development in energy efficiency and clean technologies.

(4) Spending reported in this category could cover the share of spending relevant for non-ETS sectors reported under the following categories in Table 2:

- (a) development of renewable energies to meet the commitment of the Union;
- (b) development of other technologies contributing to the transition to a safe and sustainable low-carbon economy;
- (c) development of technologies that help meet the commitment of the Union to increase energy efficiency;
- (d) forestry sequestration in the Union;
- (e) encouragement of a shift to low-emission and public forms of transport;
- (f) measures intended to increase energy efficiency and insulation or to provide financial support in order to address social aspects in lower and middle income house-holds;
- (g) other reduction of greenhouse gas emissions;
- (h) measures to avoid deforestation.

(5) Spending reported in this category could cover the share of spending relevant for non-ETS sectors reported under the following categories in Table 2:

- (a) funding of research and development and demonstration projects for reducing emissions and for adaptation;
- (b) funding of initiatives within the framework of the European Strategic Energy Technology Plan and the European Technology Platforms;
- (c) financing of research and development in energy efficiency and clean technologies.

(6) Spending reported in this category falls outside the scope of the purposes specified in Articles 10(3) and 3d(4) of Directive 2003/87/EC.

(7) Spending reported in this category could cover spending reported under the following categories in Table 2:

- (a) coverage of administrative expenses of the management of the EU ETS;
- (b) adaptation to the impacts of climate change;
- (c) promotion of skill formation and reallocation of labour in order to contribute to a just transition to a low carbon economy;
- (d) other domestic uses.
